

Participation in Fund Raising Activities

Students may participate in fund raising activities in the schools. The administration shall determine the nature and extent of such activities. The board encourages service type fundraisers. All fundraisers for school district programs or school district sponsored programs shall be reviewed and approved by the board. Sale type activities should be limited so as not to become a burden to the community. It is highly recommended that student organizations should be limited to one major sale type fundraiser per school year.
